

Using the Implant Eligibility Checklist

Scenario 1: Your client is a healthy 24-year-old woman who gave birth to her first child five months ago. She has been fully breastfeeding and has not had a menstrual period since giving birth. She is returning to work in two weeks and will begin supplementing with formula.

Notes: _____

Scenario 2: Your client is a 30-year-old woman who is married, monogamous, and has three children. She has HIV but has no symptoms and has no other health problems. She has been using condoms consistently and correctly but is still concerned that she might become pregnant.

Notes: _____

Scenario 3: Your client is a 42-year-old woman with five children. Six months ago, she was admitted to the hospital with severe chest pain and shortness of breath. She was diagnosed with a blood clot in her lung. She is now on anticoagulant therapy (blood thinners). She has no other health problems. She has not had sex since her last menses.

Notes: _____
